- Bolt-on galvanized bumper
- LED lights

AVAILABLE SIDEWALL CONFIGURATIONS

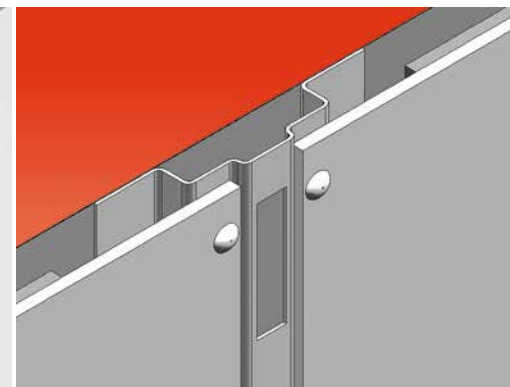

ULTRAPLATE

This 101 3/4" wide trailer is made with an industry leading composite panel. A true anti-slag liner protects freight from being damaged. This unique post design also allows for simple and fast panel replacement. Post centers are: 16", 24" and 48". XD bottom rail is available for severe applications.

ULTRAVAN

This versatile trailer offers the best of both worlds in a sheet and post design combined with a durable composite interior liner. This "fastener free" design provides a clean, anti-slag finish that is much more durable than standard plywood designs. Our unique hook joint design provides a reliable panel to post attachment and allows for quick panel replacement without the need for any tools. Various widths up to 100" 3/8 are available and post centers are: 12", 16" and 24".

TRADITIONAL

A tried, tested and true design that offers customers the ultimate flexibility in spec and design. Posts centers are: 12", 16" and 24". Various insulation packages for heat and other applications, heavy duty posts for decking operations and multiple styles of kick plates suited to your individual requirements.
